KINESIOLOGY

Also see listing for **Athletics**.

Kinesiology is an introduction to the interdisciplinary approach to the study of human movement related to physical activity and sport. Our kinesiology courses teach students an appreciation of the role exercise, activity and sports play in the development of wellrounded individuals interested in physical well-being and the productive use of leisure time. *The College of Alameda Department of Kinesiology is in the STEAM division* (*Science, Technology, Engineering, Art, and Mathematics*).

Why study Kinesiology? It provides each person the opportunity to acquire a strong knowledge base in Kinesiology and its applications that is comparable to that offered by four year institutions.

What can you do with Kinesiology? Four year universities/colleges, throughout the country, offer undergraduate and graduate degrees in the field of kinesiology. Related majors such as health, physical therapy, athletic training, sports training, recreation, and coaching may require "Introduction to Kinesiology".

The College of Alameda offers a program encompassing both physical education activities and academic courses. Our activity courses include both sports and physical fitness. The fitness center provides a fully-equipped and supportive environment for strength and aerobic training. Our state of the art gymnasium is the location for both our sports, aerobics, cross-fit, and circuit training activities. The Kinesiology academic offerings include "Introduction to Kinesiology" and "Care and Prevention," both are requirements for our Certificate of Achievement "Athletic Trainer Aide."
